

Houston Endowment Headquarters

Archetype team - 10/02/2023

First purpose-built headquarters for the Foundation creates a more central, accessible, and welcoming base of operations along the Buffalo Bayou in Houston's Spotts Park. Design facilitates a new way of working with the Foundation's partners across the public, private, and nonprofit sectors in an elegant, airy structure that meets the 2030 Net Zero Challenge.

The nearly 32,000-square-foot, \$21 million building serves as the Foundation's first purpose-built headquarters. The organization's relocation from an office tower in Downtown Houston to an engaging, sustainable, and accessible new headquarters in Spotts Park reflects its on-the-ground ethic as a vital source of support and collaboration within the city. The building provides the Foundation with a new way of working with its partners across the public, private, and nonprofit sectors and will support the mission of advancing equity of opportunity for the people of Greater Houston and enhancing the vibrancy of the region.
