Archetype

New Cyprus Museum

Archetype team - 20/06/2025

The New Cyprus Museum will be a symbol of Cyprus’ rich history and a vibrant new civic space in the city. It will be a living institution; celebrating the past, fostering contemporary exchange and debate, and promoting new futures for Cypriot culture.

The New Cyprus Museum building creates an open public ground, allowing access from all sides, and inviting visitors into and through the site. The architecture crafts interior and exterior spaces simultaneously, treating the gardens and grounds as extensions of the museum.
