

Private Company Offices

Archetype team - 29/08/2025

In the center of the seaside suburb of Glyfada, are the headquarters of Helikon Shipping, a shipping company with a rich heritage since 1961. Today Helikon is low profile company, of high standards, professionally and culturally related to Japan. Accordingly, Urban Soul Project was asked to design a space with a notion to Japan, incorporating a subtle use of color. As a result, the contemporary design approach of the office articulates a distinct design language, which nevertheless foresees the integration of elements from Helikon's past, as well as the cultural and professional relationship with Japan.
